Abdelrahman Nabil Ewis

Data & Business Analyst | Power BI Developer | Python Developer

bodynabilewis@gmail.com +201022197468 Mansoura linkedIn Portfolio GitHup

SUMMARY

Aspiring Data Analyst with practical experience in **data analysis**, **business intelligence**, and **machine learning**. Worked on several projects involving **predictive analytics**, **AI-powered systems**, and **interactive dashboards**. Proficient in **Python**, **Power BI**, **Excel**, and **SQL**, with a strong interest in turning complex data into **clear** and **actionable insights**.

PROFESSIONAL EXPERIENCE

Sanadk for Business Solutions, *Data Analyst* 07/2026
Mansoura

- Analyzed operational and business data using **SQL and Python**, transforming raw datasets into **actionable insights**.
- Designed and developed interactive **Power BI dashboards** with **dynamic DAX metrics** to monitor KPIs and performance trends.
- Cleaned and structured complex datasets to improve **data accuracy, reporting efficiency**, and decision-support processes.

Smart Automatic Retopology System (Academic Project), *AI & Machine Learning Developer* 02/2026 – 06/2026
Mansoura, Egypt

- **Developed** an AI-powered system to automate 3D mesh retopology, optimizing geometry reconstruction and reducing manual modeling.
- **Trained Deep Learning models** using Python and feature engineering on 3D data to enhance automated topology generation accuracy.

Smart Hire (Academic Project), *AI & Data Analyst Developer* 01/2025 – 04/2025
Mansoura, Egypt

- **Developed** an AI recruitment system utilizing NLP and LLMs for automated CV screening and interactive career guidance.
- **Built** a job-matching model to compare resumes with job descriptions, optimizing candidate placement using similarity scores.

Machine Failure Prediction System (Academic Project), 01/2024 – 04/2024
Machine Learning & Data Analyst Project Developer Mansoura, Egypt

- **Built** a predictive maintenance system utilizing machine learning models to forecast equipment failures from historical data.
- **Integrated** an LLM component to generate automated insights and text-based maintenance recommendations for decision-makers.

PROJECTS

Smart Hire – AI-Powered Recruitment System

- Developed an AI-powered recruitment platform for CV screening and job matching, **reducing manual candidate filtering time by 40%**.
- Utilized NLP and LLMs to analyze resumes and job descriptions, achieving an **88% matching accuracy rate** for candidate placement.

Machine Failure Prediction System

- Developed machine learning models using XGBoost and LightGBM to predict machine failures, achieving **92% prediction accuracy** and optimizing maintenance scheduling.
- Built an LLM-based assistant for maintenance recommendations and failure explanations, **reducing system downtime by 15%**.

Smart Automatic Retopology System

- Developed an AI-powered Blender add-on for automated 3D mesh retopology and topology optimization, supporting **100+ complex 3D geometry tests**.
- Trained Deep Learning models on 3D geometry data to improve mesh quality by **20%** and **reduce manual modeling time by 30%**.

Regional Sales & Profitability Interactive Dashboard

- Developed an interactive Excel dashboard to analyze sales performance and profitability across regions and customer segments.
- Created dynamic KPIs, formulas, and slicers to support data-driven decision-making.

Human Resources & Workforce Analytics Dashboard

- Built an HR analytics dashboard to monitor payroll, workforce distribution, and employee performance.
- Analyzed workforce metrics to support resource planning and decision-making.

Bakery Business Performance & Sales Dashboard

- Built a Power BI dashboard to analyze revenue, sales performance, and customer insights.
- Created interactive visualizations to track trends, profitability, and regional sales performance.

Enterprise Sales & Production Operations Analytics

- Built a Power BI dashboard to monitor revenue, production efficiency, and sales performance.
- Analyzed customer, product, and regional data to generate actionable business insights.

E-Commerce Retail Data Cleaning & Data Wrangling Pipeline

- Built a data cleaning pipeline using Python (Pandas) to prepare e-commerce data for analysis.
- Handled missing values, outliers, and data quality issues to ensure reliable insights.

CERTIFICATES

Professional Data Analyst (Data analysis program covering **SQL**, **data warehousing**, and **Python**/**Excel**-based **data preprocessing** and **automation**.) | **Data Analysis Diploma – Route Academy** (• **Data Analysis & Visualization:** Data cleaning, modeling, and building interactive dashboards using Power BI, Tableau, and Excel. • **Technical Stack:** Advanced SQL and Python for data exploration, visualization, and web scraping.) | **NVIDIA DLI - Building RAG Agents with LLMs** (**Built and deployed RAG-based AI systems integrating LLMs with external knowledge bases, with hands-on experience in prompt engineering, vector databases, and optimizing retrieval pipelines for improved accuracy.**)

SKILLS

Data Analysis & BI (Power BI (DAX, Power Query) • Excel (Pivot Tables, Power Query, Functions) • Google Sheets • ETL) | **Databases & Data Engineering** (SQL Server, ERD, Mapping, Database Schema, Data Modeling, SSRS, SSIS, Data Warehousing) | **Programming Languages** (Python, • SQL, • C++) | **Data Science & Machine Learning** (Predictive Modeling, Exploratory Data Analysis (EDA), Feature Engineering, Machine Learning Algorithms) | **Core Competencies & Soft Skills** (Analytical Thinking, Problem-Solving, Business Insights, Storytelling, Teamwork, Time Management)

EDUCATION

Delta University for Science and Technology, *Bachelor's Degree in Artificial Intelligence* — 05/2024 – Present, Gamasa,Egypt

LANGUAGES

Arabic (Native) | **English** (B1)
